

Muhammad Adnan

Native Android Developer — Software Engineer

Mianwali, Pakistan — +92 306 9050528 — adnanshaheen.se@gmail.com
[Portfolio](#) — [GitHub](#) — [LinkedIn](#) — [Medium](#)

Professional Summary

Software Engineer and Native Android Developer specializing in Kotlin, Jetpack Compose, MVVM, Clean Architecture, Firebase, REST APIs, Room Database, and Material Design. Experienced in developing production-ready Android applications with scalable architecture, clean UI, offline-capable features, and reliable performance. Strong foundation in software engineering principles, database systems, debugging, testing, documentation, and real-world product delivery.

Technical Skills

Android Development: Kotlin, Java, Jetpack Compose, Android SDK, Android Jetpack, XML, Material Design 3, Android Studio

Architecture & Patterns: MVVM, Clean Architecture, Repository Pattern, Coroutines, State Management

Databases & APIs: Room Database, SQLite, Firebase, REST APIs, JSON

Tools & Practices: Git, GitHub, Gradle, Debugging, Testing, Play Store Deployment, Technical Documentation

Programming Concepts: Object-Oriented Programming, Data Structures, Software Engineering Principles

Work Experience

Android Developer Intern

Okra Software House

Jun 2025 – Oct 2025

Mianwali, Pakistan

- Developed clean, maintainable Kotlin code using modern Android development standards and declarative UI practices.
- Built hybrid Android screens using interoperability APIs to enable smooth integration between Jetpack Compose and XML views.
- Assisted in migrating legacy XML-based layouts to Jetpack Compose, improving UI maintainability and consistency.
- Reduced boilerplate code by applying reusable components, structured state handling, and Compose-based UI patterns.

Software Engineer

Deputy Commissioner Office

Feb 2025 – Apr 2025

Mianwali, Pakistan

- Designed and developed a monitoring software portal for departmental reporting, performance tracking, and data visibility.
- Gathered requirements from multiple departments and translated operational needs into functional software modules.
- Implemented real-time data collection and analytical reporting features to support administrative decision-making.
- Improved usability for departmental staff by creating a clean, structured, and user-friendly interface.

Native Android Developer

NexAppra

Jan 2026 – May 2026

Remote

- Developed and published a production-ready Expense Tracker Android application on the Google Play Store.
- Built the app using Clean Architecture, scalable project structure, and native Android development best practices.
- Implemented interactive financial dashboards to help users monitor expenses and understand spending patterns.
- Added CSV and PDF export features for reporting, record keeping, data sharing, and backup workflows.
- Designed the application with zero hardcoded data to improve maintainability, scalability, and long-term reliability.
- **App Link:** [Expense Tracker on Google Play](#)

Native Android Developer

NexAppra

Apr 2026 – Jun 2026

Remote

- Developed and published UniMatch, a native Android application for exploring, comparing, and matching academic options.
- Designed professional mobile screens with smooth navigation, clean layouts, and a user-focused UI/UX structure.
- Applied Kotlin, MVVM, Clean Architecture, local data handling, and scalable module organization.
- Integrated real application data and avoided dummy or hardcoded content to support a practical production workflow.
- Managed testing, release preparation, app packaging, and Google Play Store deployment.
- **App Link:** [UniMatch on Google Play](#)

Projects

HUNARMAND – Service Deployment Platform

Sep 2025 – May 2026

Final Year Project in industrial partnership with Technology Inn

- Developed an industry-focused service platform to connect skilled blue-collar workers with local job opportunities.
- Contributed to Android app development, system planning, feature design, software documentation, and testing activities.
- Applied requirement analysis, database design, clean architecture, and maintainable coding practices throughout development.
- Collaborated with team members and industrial stakeholders to align product features with real market needs.
- Presented the project at Namal Innovation Expo 2026, where HUNARMAND secured the Runner-Up position.

Hostel Manager App

Academic Project

Kotlin, Room Database, SQLite, MVVM, Material Design

- Built a hostel management application to digitize manual resident records and improve administrative tracking.
- Implemented key modules for room allocation, student attendance, mess management, and complaint registration.
- Used Room Database and MVVM architecture to organize local data handling and maintain a clean project structure.

Android Developer Portfolio App

Academic Project

Kotlin, Jetpack Compose, Material Design 3

- Created a modern portfolio application to showcase Android development skills, professional projects, and UI design abilities.
- Designed responsive Compose-based screens using Material Design 3 principles for a clean and polished user experience.

Education

BS Software Engineering

Expected May 2026

University of Mianwali

Mianwali, Pakistan

CGPA: 3.13/4.00

ICS Computer Science

2020 – 2022

BISE Sargodha

Pakistan

Marks: 770/1100

Matriculation, Science Group

2018 – 2020

BISE Sargodha

Pakistan

Marks: 854/1100

Certifications

Advanced Programming in Kotlin – Meta, Coursera

Jul 2025 – Sep 2025

[Credential Link](#)

Leadership & Volunteering

President, Blood Donation Society

University of Mianwali

Oct 2022 – Present

Mianwali, Pakistan

- Led a student volunteer team to organize blood donation camps, awareness drives, and emergency donor coordination activities.
- Coordinated donor response efforts by connecting available donors with patients at DHQ Hospital and local clinics.
- Initiated digitization of manual donor records by designing and developing a Blood Donation App to improve search efficiency.
- Collaborated with university administration and medical authorities to improve volunteer coordination and community impact.
